GentlePro™

Make sure your laser hair
removal treatments are **Gentle**

Gentle Pro is the next step in laser-based hair removal and skin care. Using light energy, Gentle Pro penetrates the hair follicle, destroying it at its root while preserving the surrounding skin.

Gentle Pro is also a gentle, proven method of reducing wrinkles and removing pigmented lesions, including age spots, freckles and damage from the sun.

Experience:

Smoother skin, free of unwanted hair

Freedom from sun-damaged skin,
age spots or freckles

A reduction in wrinkles

What is the Gentle Pro treatment like?

Laser energy is delivered through a small handpiece operated by your practitioner. The laser delivers an intense beam of light, which is absorbed by the skin and converted to heat. The heat is then absorbed by the cells being targeted, while the surrounding tissue remains unaffected. Your skin may be pink immediately following the procedure; typically, this lasts from a few minutes to several hours after the procedure.

Are the treatments painful?

The Gentle Pro system uses a patented Dynamic Cooling Device™ (DCD™), which prepares the skin for treatment by spraying the upper layers with a cooling burst of cryogen in adjustable durations, milliseconds before and after the laser pulse. DCD helps ensure that Gentle Pro treatments are as comfortable as they are effective.

What precautions should I take throughout this process?

Discuss your specific needs with us before beginning the Gentle Pro treatments, but there are a few precautions you'll need to take. Avoid sun exposure at least two weeks before treatment. Do not bleach, pluck or wax four to six weeks before and after treatment. Wait until your tan fades before beginning treatment.

How long do Gentle Pro treatments take, and how many treatments will I require?

Treatment times may vary depending on your specific needs, but treatments can usually be performed in under an hour.

You'll want to discuss your specific needs with us to determine how many treatments you'll require.

Are Gentle Pro treatments safe, and are there any side effects?

Laser and light-based treatments have been safely used for many years for a variety of medical and cosmetic procedures.

All treatment results are individual, but most procedures have a low risk of adverse side effects. Some patients experience pigment changes that generally vanish over time.

Are Gentle Pro treatments covered by insurance?

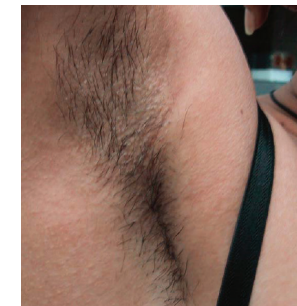

Most insurance companies do not offer reimbursement for cosmetic and aesthetic procedures. Please consult your insurance carrier for details.

How much do treatments cost?

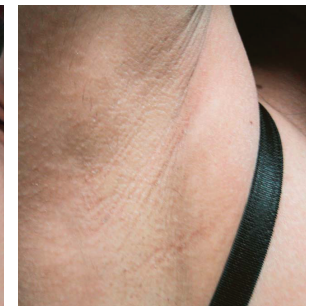

Cost depends on the area and condition being treated. Discuss your personal needs with us to learn more.
